EXPERIENCE

Daraz, Sri Lanka — Information Technology Intern

Oct 2025 – Jan 2026

- Resolved 210+ hardware, software, and network support tickets, achieving a 95% first-contact resolution rate through rigorous diagnostics, OS configuration, and system updates across 100+ enterprise devices.
- Streamlined IT operations and boosted user satisfaction scores by collaborating with senior engineers on complex technical escalations within an Agile environment, effectively translating technical solutions for non-technical stakeholders.

SKILLS & CERTIFICATES

Programming & Scripting: Python, Java, JavaScript, C++, SQL, React, Spring Boot, FastAPI, Pandas, NumPy

Methodologies & Tools: Agile/Scrum, CI/CD Pipelines, Git, REST APIs, Docker, PostgreSQL, SQLAlchemy, JWT Auth, Unit Testing, OOP, MVC

Certificates: AI/ML Engineer - Stage 1, Python Programming, Front-End Web Development, Graphic Design Essentials, Diploma in Computer Hardware & Networking

PROJECTS

SafeText AI — Adversarial Text Sanitization Framework — **In Progress**

- Engineering a dual-model NLP pipeline to detect and sanitise Unicode-based adversarial attacks (homoglyphs, zero-width characters, mixed scripts); fine-tuned DistinctBERT (DistilBERT) for three-class sensitivity classification achieving 86.39% accuracy and 0.84 macro F1 on a balanced 30k Jigsaw corpus.
- Adapted TinyLlama-1.1B-Chat via LoRA/PEFT (0.20% trainable params) for adversarial text correction; deployed full pipeline as a Flask REST API with a responsive dark-mode web dashboard, optimised to 2.2GB RAM using bfloat16 precision.

MindSnap — AI-Powered Visual Second Brain — <https://mindsnap-sigma.vercel.app>

- Built a full-stack AI web app where users save any text or URL and receive an auto-generated title, summary, content type, and tags using a 3-provider AI fallback chain (Gemini → Claude → Groq).
- Engineered a FastAPI backend with JWT authentication, bcrypt password hashing, SQLAlchemy ORM, and PostgreSQL; deployed to Railway with Docker and a React/Vite/Tailwind frontend on Vercel.
- Backend: <https://mindsnap-production.up.railway.app/docs> | GitHub: github.com/Chahethsen12/mindsnap

DevLog API — Developer Activity Logger — <https://github.com/Chahethsen12/devlog-api>

- Built a production-ready REST API for logging daily coding activity with filtering by language/mood, pagination, and full JWT authentication using FastAPI and PostgreSQL.
- Achieved 14/14 tests passing with pytest, configured GitHub Actions CI/CD pipeline with SQLite for isolated test runs, and containerized the service with Docker for Railway deployment.

Redex — Vehicle Hiring Platform — github.com/Chahethsen12/Redex

- Architected a comprehensive vehicle rental web application featuring dynamic property listings, secure user authentication, and a real-time reservation system.
- Engineered a scalable backend using Spring Boot and a responsive frontend with ReactJS, implementing a robust MVC architecture with automated CI/CD pipelines.

HeartQuest — Educational Arcade Game — github.com/Chahethsen12/heart-quest

- Developed a dynamic 2D educational arcade game using Python and Pygame, integrating external REST APIs for real-time weather-based themes and dynamic quizzes with bcrypt-secured user data.
- Coordinated cross-functional development tasks using Git and Agile methodologies, resulting in seamless code merges and efficient iterative debugging.

Pro AI Blog Engine — AI-Powered Blogging Platform — <https://github.com/Chahethsen12/pro-ai-blog>

- Built a full-stack AI blogging platform with a hybrid architecture supporting 100% offline generation via Ollama (Llama 3) and online generation via Google Gemini API, with automated MDX content pipelines.
- Engineered a React/Vite/Tailwind frontend with real-time RAG-based article summarization, an Express.js proxy for secure server-side API key management, and Node.js scripts for automated MDX generation with frontmatter and SEO metadata.

EDUCATION

University of Bedfordshire — BSc (Hons) Computer Science Sep 2025 – Present

- Key Research/Projects: Currently engineering a dual-model framework for adversarial text and input sanitization utilizing Machine Learning and NLP techniques.
- Core Focus: Software Engineering, Data Structures & Algorithms, Secure Software Development.

SLIIT City University — Higher National Diploma in Information Technology Oct 2022 – Sep 2025

- Completed 21 comprehensive IT modules encompassing software engineering, database management, web development, and networking, establishing a strong foundation in full-stack development.

Ananda College — G.C.E Ordinary & Advanced Level (Physical Science Stream) 2015 – 2021

LEADERSHIP & ACTIVITIES

Rotaract Club of Colombo Regency — Editor Jun 2025 – Present

- Spearhead digital content creation across Facebook, Instagram, TikTok, and WhatsApp, driving online engagement and maximizing visibility for club initiatives.
- Partner with cross-functional club members to orchestrate high-impact digital campaigns that highlight community events and organizational achievements.
