Experience

Daraz, Sri Lanka

Information Technology Intern

Colombo, Sri Lanka

Oct 2025 – Jan 2026

- Resolved 210+ hardware, software, and network support tickets, achieving a 95% first-contact resolution rate through rigorous diagnostics, OS configuration, and system updates across 100+ enterprise devices.
- Streamlined IT operations and boosted user satisfaction scores by collaborating with senior engineers on complex technical escalations within an Agile environment, effectively translating technical solutions for non-technical stakeholders.

Skills & Certificates

- Programming & Scripting:** Python, JavaScript, C, SQL, HTML/CSS, React, Flask, FastAPI, Spring Boot, Pandas, NumPy.
- Methodologies & Tools:** Git, GitHub, Agile/Scrum, REST APIs, OOP, CI/CD, unit testing, debugging, database design.
- Certificates:** CS50x: Introduction to Computer Science, Python Programming, Front-End Web Development, AI/ML Engineer - Stage 1, Large Language Models - Level 1, AWS AI Practitioner Challenge.
- Soft Skills:** Communication, Teamwork, Problem-solving, Leadership, Adaptability, Time management, Resilience

Projects

SafeText AI - Adversarial Text Sanitization Framework

Link: <https://huggingface.co/spaces/Chahethsen/SafeText-AI> | Github: <https://github.com/Chahethsen12/SafeText-AI>

- Developed a dual-model NLP pipeline to detect and sanitise Unicode-based adversarial attacks (homoglyphs, zero-width characters, mixed scripts); fine-tuned DistilBERT for three-class sensitivity classification achieving 86.39% accuracy and 0.84 macro F1 on a balanced 30k Jigsaw corpus.
- Adapted TinyLlama-1.1B-Chat via LoRA/PEFT (0.20% trainable params) for adversarial text correction; deployed full pipeline as a Flask REST API with a responsive dark-mode web dashboard, optimised to 2.2GB RAM using bfloat16 precision.

MindSnap - AI-Powered Visual Second Brain

Link: <https://mindsnap-sigma.vercel.app/> | Backend: <https://mindsnap-dn2q.onrender.com/>

Github: <https://github.com/Chahethsen12/mindsnap>

- Built a full-stack AI web app where users save any text or URL and receive an auto-generated title, summary, content type, and tags using a 3-provider AI fallback chain (Gemini → Claude → Groq).
- Engineered a FastAPI backend with JWT authentication, bcrypt password hashing, SQLAlchemy ORM, and PostgreSQL; containerized with Docker and deployed on Render, with a React/Vite/Tailwind frontend hosted on Vercel.

DevLog API — Developer Activity Logger

Link: <https://devlog-api-8ruz.onrender.com/docs> | Github: <https://github.com/Chahethsen12/devlog-api>

- Built a production-ready REST API for logging daily coding activity with filtering by language/mood, pagination, and full JWT authentication using FastAPI and PostgreSQL.
- Achieved 14/14 tests passing with pytest, configured GitHub Actions CI/CD pipeline with SQLite for isolated test runs, and containerized the service with Docker and deployed it on Render using PostgreSQL as the backing datastore.

HeartQuest: Educational Arcade Game

Link: <https://github.com/Chahethsen12/heart-quest>

- Developed a dynamic 2D educational arcade game using Python and Pygame, integrating external REST APIs for real-time weather-based themes and dynamic quizzes with bcrypt-secured user data
- Coordinated cross-functional development tasks using Git and Agile methodologies, resulting in seamless code merges and efficient iterative debugging.

SmartSpend: CLI Expense Tracker with AI Insights

Link: <https://github.com/Chahethsen12/SmartSpend>

- Designed and developed a privacy-focused personal finance management system in Python, featuring expense tracking, filtering, reporting, CSV export, and local JSON-based data storage.
- Built a robust software architecture with modular service layers, automated testing (61 pytest cases), error handling, and multi-provider AI integration using Google Gemini and Groq APIs.

Education

University of Bedfordshire

Bsc (Hons) in Computer Science - First Class

- Key Research/Projects: Dual-model framework for adversarial text detection and input sanitization using Machine Learning and NLP techniques.
- Core Focus: Software Engineering, Data Structures & Algorithms, Secure Software Development, Distributed Service Architectures, Agile Project Management.

Luton, London

Sep 2025 – Jun 2026

SLIIT CITY UNI

Higher National Diploma in Information Technology

- Completed 21 comprehensive IT modules encompassing software engineering, database management, web development, and networking, establishing a strong foundation in full-stack development and enterprise system architecture.

Colombo, Sri Lanka

Oct 2022 – Sep 2025

Ananda College

G.C.E (Ordinary Level) and G.C.E (Advanced Level)

Colombo, Sri Lanka

2015 – 2021

Leadership & Activities

Rotaract club of Colombo Regency

Editor

- Spearhead digital content creation and management across Facebook, Instagram, TikTok, and WhatsApp, significantly driving online engagement and maximizing visibility for club initiatives.
- Partner with cross-functional club members to orchestrate high-impact digital campaigns that highlight community events and organizational achievements.

Colombo, Sri Lanka

June 2025 – June 2026
